

Arcadia Contract™ Motorized Bracket System

By Shades by Matiss. Open roll, 4 in. fascia, and 5 x 6 in. double configurations

Arcadia simplifies motorized commercial installs with a cleaner, repeatable bracket and motor mount. The system supports star head motors on integrated bearing brackets, which lowers drag and noise and makes installs faster across a wide range of project conditions.

MOTOR	LIGHT GAP	MAX ROLL-UP	BRACKET CAPACITY
Star head motors	7/8 in.	4 1/8 in.	40 lbs

Arcadia 4 in. fascia, coupled shades

BEST-USE APPLICATIONS

- Offices and corporate interiors
- Education and healthcare
- Multifamily common areas
- Wide openings with coupled shades

KEY BENEFITS

- Integrated bearing brackets for quieter operation and lower drag
- Standard 7/8 in. light gap for clean, consistent lines
- Ceiling, left, or right wall mount
- Collapsible idler for one person installation
- Zinc coated metal components and high strength nylon idler housings

One person can hang the shade: rest the ball end of the spring loaded shaft on the collapsible idler, then rotate the motor end into the motor bracket.
