

ARCADIA CONTRACT

Motorized Bracket & Fascia System

Architectural Simplicity. Mechanical Integrity.

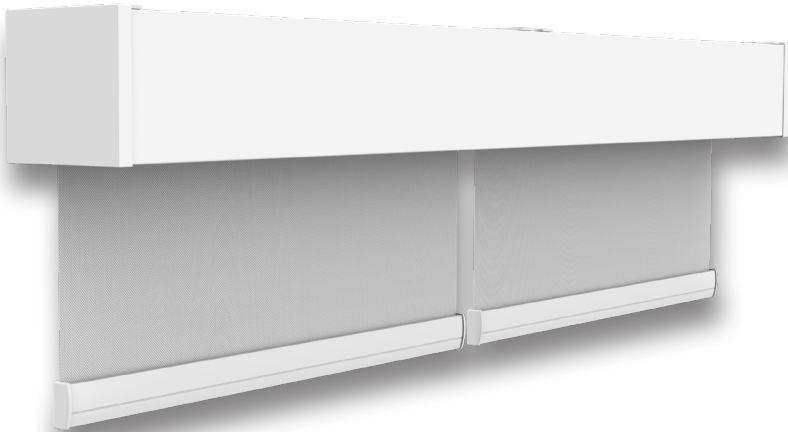

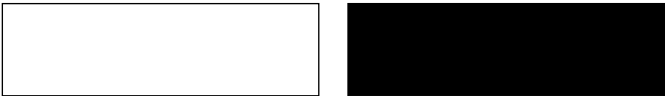

Shades by Matiss introduces the Arcadia Contract™ Collection, a precision-engineered bracket and fascia system designed specifically for commercial motorized shading applications.

Built to support star head motors and outfitted with standard bearing brackets, the system reduces drag and noise while enabling easier, faster installations across a wide range of project conditions.

Available Configurations

Open Roll Bracket	Minimal, exposed roller design with a compact profile
Open Roll Coupler	Couples two shades on a shared tube, with smooth operation and clean spacing
4" Fascia Bracket	Bracket system with integrated fascia cover, available in multiple finishes
4" Fascia Coupler	Double-shade fascia system for seamless visual continuity
5" x 6" Double Bracket	Accommodates two adjacent shades independently for wider openings
5" x 6" Double Coupler	Couples two shades into a wide run with fascia compatibility

Bracket & Fascia Finish Options

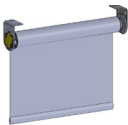

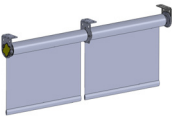

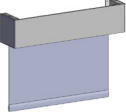

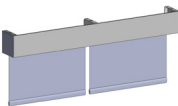

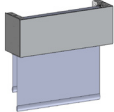

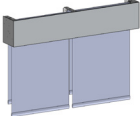

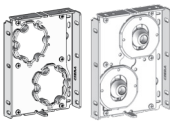

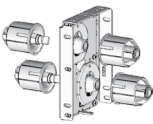

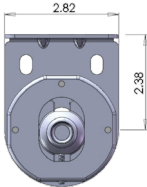

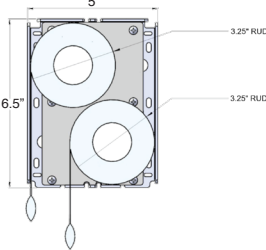

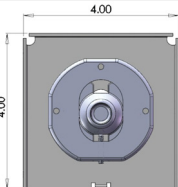

System Features

- Compatible with star head motors
- Integrated bearing brackets for quieter operation and lower drag
- Standardized 7/8" light gap for clean, consistent lines
- Ceiling, left, or right wall mount configurations
- Corrosion-resistant zinc-coated metal components
- High-strength nylon idler housings
- Collapsible idler for one-person installation
- Maximum roll-up diameter: 4/18" (short brackets), 3 7/8" (with 4" fascia)
- Weight capacity: 40 lbs.

Idler End Installation

Innovative collapsible idler allows for easy, one person installation by resting ball-end of the spring loaded shaft on the idler while rotating motor end of the shade into motor bracket.
