Cassette Installation Instructions

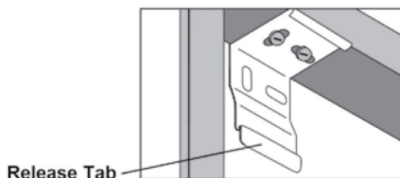

- A. Mount the brackets to the wall or window frame with the outside brackets no further than 2 inches from the ends of the headrail. On wide shades, space the additional brackets at equal intervals.

- B. For wall or outside mounts, use the rear bracket holes. Make sure the release tab is always mounted on the bottom. Insert "Release Tab" beside the line.

- C. For inside or ceiling mounts, use the top bracket holes. Make sure the release tab is always mounted on the bottom.

- D. Mount the Headrail by positioning the Headrail with the front panel (A) resting on the top lip of all brackets. Push the bottom front of the headrail firmly backwards and toward the window until the lip on the rear of the Headrail engages the bracket and snaps into place, (B) as shown.
