

## FIVEZEROGREEN

**Almedahls AB develops, manufactures, markets and sells products for decoration of public spaces and homes.**

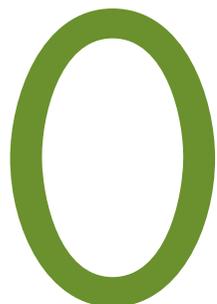

Our product development process and our products are designed with a view to minimize the environmental impact during the lifetime of the products. We comply with current legislation and other environmental requirements. We work continuously to reduce the impact on the environment from all activities in our company. This continuous work is carried out in accordance with Almedahls' sustainability program Five Zero Green and in accordance with UN's Sustainable Development Goals (SDGs); Agenda 2030.

**FIVE ZERO GREEN** are zero-visions we aim at together with our partners in the supply chain to achieve a sustainable manufacturing process and products.

We have already come a long way after decades with high environmental awareness with regards to both process and product leading to our Swedish production facility being CO<sub>2</sub>-neutral and fossil-free with positive impact on greenhouse gases and the climate.

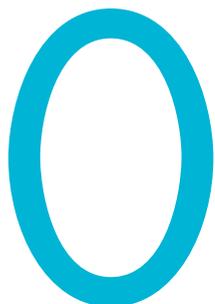

## FIVEZEROGREEN

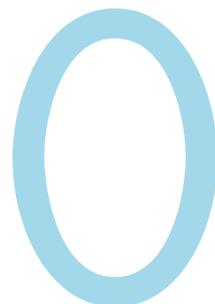

**ENERGY**  
**CO<sub>2</sub> neutral, fossil-free & renewable**

Our production process is CO<sub>2</sub> neutral and based upon renewable and fossil-free energy

**WATER**  
**Circular & Optimized**

Our water usage is circular – borrowing and returning clean water to nature and we minimize water consumption

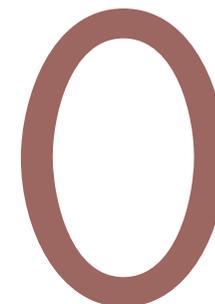

**AIR**  
**Greenhouse gas reduction**

We contribute to reduced greenhouse gases and our production process release to air has the least possible impact on air quality

**RAW MATERIALS**  
**Minimized impact**

Our demands go beyond REACH and we apply raw materials with the least possible consequence to our health and environment

**WASTE**  
**Minimize, upcycle & recycle**

Our high quality and upcycling minimize waste whilst actual waste is recycled as energy or new materials
