COLORS

COLOR NAME	LIGHT FILTERING		ROOM DARKENING	
	FABRIC NUMBER	COLOR NUMBER	FABRIC NUMBER	COLOR NUMBER
Powder	TVSLF	101	TVSRD	101
Chiffon	TVSLF	102	TVSRD	102
Chalk	TVSLF	114	TVSRD	114
Bisque	TVSLF	107	TVSRD	107
Flax	TVSLF	104	TVSRD	104
Ecru	TVSLF	119	TVSRD	119

1. Enter width and height dimensions to the nearest $\frac{1}{8}$". With outside mounts, be sure to allow a minimum of $1\frac{1}{2}$" floor clearance. (With inside/ceiling mounts, $\frac{1}{2}$" for floor clearance is automatically deducted from ordered height.)
2. Enter fabric number and color number. Example: TVSLF 101
3. Mark "X" in the column for the desired control type.
4. Mark "X" in the column for desired mounting style.
5. Mark "X" in the column for desired stacking design. For split stacks, mark "L" or "R" in the control side column.
6. All no-charge options pertain to outside mounts only. Unless extension brackets are ordered, enter the number of spacer blocks needed. One comes with each installation bracket and up to three additional may be ordered. Mark an "X" in the appropriate column if either the standard or XL extension brackets are needed.

Special Notes:

5																

*Outside Mount (OB) side stack only.

Line#	QTY.	Dimensions[1]		Fabric [2]		Control Type [3]		Mounting Style [4]		Stacking Design [5]				No-Charge Options [6]		
		Width	Height	Fabric Number	Color Number	Wand/Cord	Moving Wand	Outside Mount (OB)	Inside/Ceiling Mount (IB)	Left Stack	Right Stack	Split Stack	Split Stack Control Side	1/2" Spacer Blocks	EXT. Brackets	XL EXT. Blocks
1	1	98 ¾"	89"	TVSLF	101		X	X		X				2		
2	1	120"	95 ¾"	TVSRD	101	X			X	X						
3	1	119 ½"	88 ½"	TVSRD	102	X		X				X	L	1		
4	1	156"	93 ¼"	TVSLF	114	X		X		X				1		
5	1	156"	93 ¼"	TVSLF	114	X		X			X			1		

LINE 1 EXAMPLE

• Dimensions. The width dimension of 98 3/4" takes into account stackback of 22 3/8" and also allows approximately 5" of overlap on the stacking side. The 89" height dimension allows for 1/2" of floor clearance. (The actual height measurement was 89 1/2".)
• Fabric. TVSLF-101 is white fabric with light-filtering vanes.
• Control Type. The moving wand was chosen for this outside mountside stack application.
• Mounting Style. Outside mount.
• Stacking Design. Left stack.
• No-Charge Options. Because this shading will be mounted above 1/2" molding, one additional spacer block was ordered, for a total of two.

LINE 2 EXAMPLE

• Dimensions. The width dimension of this wall-to-wall ceiling mount is 120". The ordered height is 95 3/4". The actual height measurement was 96". Because this is a ceiling mount, 1/2" will automatically be deducted for floor clearance. However, because the floor surface is thick pile carpet, an additional 1/4" clearance was desired and so 1/4" was deducted from the measured height.
• Fabric. TVSRD-101 is white fabric with room-darkening vanes. (This shading will be installed in a media room.)
• Control Type. The wand/cord was specified for this inside/ceiling mount side stack application.
• Mounting Style. Inside/ceiling mount.
• Stacking Design. Left stack.
• No-Charge Options. None of these options are needed.

LINE 3 EXAMPLE

• Dimensions. The width dimension of 119 1/2" allows the 90" wide opening to be completely uncovered when the split stack design is drawn open. Measuring for stackback is critical when split stack designs are ordered for sliding glass doors. The height dimension allows for 1/2" floor clearance.
• Fabric. TVSRD-102 is sand-colored fabric with room-darkening vanes. This shading will be installed in a bedroom.
• Control Type. The wand/cord is the only option for a split stack design.
• Mounting Style. Outside mount.
• Stacking Design. Because this shading is a split stack, the control side had to be specified; in this case, it is a left control.
• No-Charge Options. Just the standard one spacer block is needed.

LINE 4 & 5 EXAMPLE

• Dimensions. This is an abutted application, so both shadings have the same dimensions. The shadings will cover a wall of sliding glass doors 26 feet wide. Actual measured height was 94", but 3/4" was deducted to allow floor clearance over the thick carpet.
• Fabric. TVSLF-114 is ivory fabric with light-filtering vanes.
• Control Type. Wand/Cord. Moving wands are not recommended for abutted applications, plus the maximum width with moving wand is 144".
• Mounting Style. Outside mount.
• Stacking Design. As with all abutted applications, one left stack and one right stack are being ordered.
• No-Charge Options. Just the standard one spacer block is needed. (If this column was left blank, one spacer block would still be provided.)
