SAFETY TAG

⚠ WARNING
Window Blind Cord Can STRANGLE Your Child
- Children can climb furniture to reach cords.
- Move crib and furniture away.
- Keep all cords out of children's reach.
- Attach tension device to wall or floor.
- Fasteners provided with the tension device may not be appropriate for all mounting surfaces.
- Use appropriate anchors for the mounting surface conditions.

⚠ ADVERTENCIA
La cuerda de la persiana puede ESTRANGULAR su niño
- Los niños pueden subir los muebles para alcanzar las cuerdas.
- Mueva la cuna y los muebles.
- Mantenga todas las cuerdas fuera del alcance de los niños.
- Conecte el dispositivo de tensión a la pared o al suelo.
- Los sujetadores provistos con el dispositivo de tensión pueden no ser apropiados para todas las superficies de montaje.
- Utilice anclajes apropiados para las condiciones de la superficie de montaje.

ANSI/WCMA 5.2.2

The warning tag shall be used on all window covering products that have Tension Devices (attached to Cord or Tension Device).

Item#:   HD91-0120-000003
Item Description: Tension device tag 5.2.2 (2018)
Actual Label Size: 2.75" x 6.25" (large hole on top)
Addresses Section 5.2.2 ANSI/WCMA standards
Languages: English and Spanish (two sided)

SHADES BY MATISS

Roller Shade Accessories

Hem Bar, Chain and Clutch Options

Hembars

- Shade is supplied with a sealed pocket closed on all sides (compatible with Edge Side Channel blackout system)
- Rounded external hembar is available in white, vanilla, black and anodized color finishes (not compatible with Edge side channel blackout system)
- Fabric wrapped bottom rail is available when requested (not compatible with Edge side channel blackout system)
- Premium D30 bottom rail color finishes: white, gray, black (compatible with Edge side channel blackout system and guide wire system)
- Architectural hembar color finishes: white, gray (not compatible with Edge side channel blackout system)
- F56 color finishes: black, white (not compatible with Edge side channel blackout system)

D30 Bottom Rail

Available with fabric feeding funnel for fast and safe assembly the D30 bottom rail is also compatible with Rollease Acmeda's internal wire guide system for controlled movement of shade during operation.

D30 Features

- Slim and subtle design
- Available in Rollease Acmeda's standard roller shade color range
- Feeding Funnel set available for easy fabric assembly
- 15 mm spline compatibility
- Easy push fitment of plain end caps onto bottom rail
- Styled wire guide end caps with secure fitment to bottom rail using screws
- Compatible with Oval Ballast and with T-slot brush

Clutches

We use the following clutches:

SL-5, SL-10, SL-15, SL-20, SL-30 (clutch color finishes: white, vanilla, gray, black)

Galaxy Geared Clutch and Galaxy Pin End Spring Assist

Galaxy - These are gear reduction clutches that will reduce the pull forces required to operate larger shades. Galaxy Clutches are available:

G-200, for 1 ½" & 2" tube

G-400, for 1 ½", 2", 2 ½" & 3" tube

Skyline Spring Assist Pin End and Clutch Spring Assist

When shades get larger even with stronger clutches the pull forces required get greater. We offer pin end spring assist system and clutch spring assist. When a shade is lowered, gravity is used to coil a spring attached to the pin end side of the shade. When the shade is raised the coiled spring assists the operator by reducing the pull force required up to 40%. The pin end spring assists are available with 1 ½" and 2" tubes.

The clutch side spring assists come in 2 sizes and will also add to the minimum width of the shades. These additions to the minimum width of the shades are usually not an issue as they are used on larger shades anyway.
Chains Finish

Metal Nickel over Steel bead chain

Plastic Chain Color available options: White, Vanilla, Gray, Brown, Black

System Options

Edge Side Channels for light blocking (available in white, gray, black colors, compatible with sealed hembar and D30 hembar only)

Egde Channels/Guide Wire

Rollease Acmeda's EDGE SIDE CHANNELS compliment a range of cassette and fascia styles and control options with improved performance functionality and aesthetics. Designed to suit fully enclosed or partial fascia, it is compatible with the most commonly used medium roller systems. Using the EDGE SIDE CHANNELS improves the energy efficiency of any compatible system.

Chainhold Safety Tension Device Features and Benefits:

The Chainhold Tension Device by Rollease Acmeda provides a child safe tension mechanism for a chain roller system. Unless properly installed, the Chainhold Tension Device will partially prevent the window covering from functioning, making it fully compliant with the ANSI/WCMA standard for safety. The durable construction and engineered design of the Chainhold Tension Device ensures smooth, reliable performance.
Be the source for high quality, child safe products that are built to last.
Make child safety your priority.

- FAST ASSEMBLY easily and quickly assembled.
- EASY INSTALLATION with outside mounting bracket available
- SLEEK APPEARANCE small, attractive design blends with any decor
- QUIET reliable and efficient performance.
- SMOOTH OPERATION with both Rollease Acmeda metal and plastic stop balls and chain connectors.
- AVAILABLE IN 4 FASHION COLORS white, gray, black and a clear outside mounting bracket

With three dual bracket options – horizontal, vertical and universal – installing a room darkening shading system is accomplished with minimal effort. Side and bottom channels available to accomplish a complete blackout system with either regular or reverse roll.

- Same benefits as single exposed roll
- Horizontal, vertical and universal bracket options
- Can provide for complete blackout installation
- Regular roll or reverse roll

Fascia – A clean square design that is available in three different variety of colors gives you the versatility to use the fascia with either single, double or linked shades. The fascia can be an inside, outside, open wall, or ceiling mount. No need for notching thanks to chain diverters with guides. Small light gap at the header allows for complete blackout system. Color matched bracket covers available for a finished look.

- Adaptability to use with single, double or linked shades
- Chain diverters and guides eliminate need for notching
- Minimal header light gap
- Assortment of colors and sizes
- Inside, outside, open wall or ceiling mount options
- Matching bracket covers
- Blackout system options

L & I Closure Clips are suitable for installations where roller shade units are recessed inside a pocket and adequate fixtures are available for a Closure Clip to be secured. The Closure Clips offer a simple and cost effective option to the traditional pocket system.

FEATURES AND BENEFITS

- Clip profiles can eliminate the need for a full pocket extrusion in drywall pocket or "no pocket" applications.
- It is a cost saving pocket solution with minimal aluminum achieving a square recess.
- They work with the existing closure panels.
- The L clip features an extended lip that can conceal unsightly cuts.
- The L clips are a smart solution to use with suspended ceilings.
- The I clip is a slimline solution to use with a closure.
