Shades by Matiss Introduces Scandinavian Grace Collection / **Vol. I and Vol. II**

Creating Space • Color Coordinated • Sustainable • Adaptive • Functional • Flexible

Scandinavian Grace is one of our core design expressions to represent a modern look with focus on the natural, pure, classic, nuanced, unembellished, sophisticated and smart design.

Modern Classics

Architectural, sophisticated, balanced, comfortable, calm, focus on harmony and color

Materials velvet, felted wool, leather, lacquered metal, marble, bare wood, ceramic tiles, brick

Designs subtle micro patterns like different types of mesh and weave structures sparingly used and carefully coordinated with solid colors.

This collection represents a sophisticated and clean look. Textures and refined patterns are dominating together with solid colors. Contrasting materials are vital in order to bring the right balance to a composition, such as opaque and transparent - matte and shiny surfaces.

In these fast moving and uncertain times we have an increasing need to find ways to slow down. More than ever we need our homes to be calm and restful escapes. By making our rooms almost monochrome, using tones of the same color throughout, a calm, balanced atmosphere is created. A fusion of art deco shapes and hints of 1970s glamour set a tone of understated luxury and sophistication. We see a conscious person reacting to the society around, seeking to find sustainable choices, to fulfill a life where design goes hand in hand with function.

Nature Study

Stimulating, tactile, friendly, natural, inviting, relaxed

This collection represents our close relationship with nature both as a way of life a valued resource. We can see both abstract and structural patterns as well as print inspired from a worlds of plants, complimented by light and fluid influences.

Materials wood, stone, natural leather, recycled materials, seaweed, new natural fibers, coarse cotton

Designs patterns imitating nature, both calm and wild, crafted textures and imperfect finishes

The increasing awareness of the rapid climate change makes us embrace and appreciate nature experiences and simple life more than ever. To be close to clean nature becomes more and more precious to us and will be seen as luxury. This manifests in a growing interest for genuine nature materials, lasting quality, hand crafted items and ways of recycling and upgrading waste. We see a person who is aware of its consumption habits and seeks to minimize its traces on earth.

Contract Creations

Classic, elegant, spacious, flexible, safe, comfortable, focus on functionality and wellbeing

This collection represents a clean look with focus on functionality and safety. A combination between raw and refined materials, organic and geometrical designs in interaction with architecture to create spaces for comfort and wellbeing.

Materials wood, concrete, metal, glass, rendered surfaces, transparent and opaque textiles

Designs geometrical patterns and abstract nature
